DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1-3, 8-13, 18-20 are rejected under 35 U.S.C. 102(a) as being anticipated by Wobben (6,361,275).

In figures 1-3, Wobben teaches a wind turbine comprising: one sensor 38 to detect radial displacement of a shaft 22 from a predetermined positions, and a control circuit 8 coupled with the one sensor 38 to mitigate load causing the deflection on the one or more components in response to signals from the one sensor 38, wherein the control circuits 8 mitigates bending loads on the shaft 22 by controlling pitch of one or more wind turbine blades 16, the one or more components comprise a main shaft 22 of the wind turbine.

Allowable Subject Matter

Claims 4-7, 14-17, and 21-24 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
